

Project Title	Budget	Sales
Technologies	Analytics Data Science	
Domain	Retail & Sales	
Project Difficulties level	Advanced	

### Problem Statement:

Our "Domain Sale" process is structured to help potential buyers purchase the domain they want immediately without the hassle of contacting the seller directly. ... A seller lists a domain for sale at a specific price in our Marketplace. An interested buyer sees this domain for sale and decides to buy it.

Extract various information such as Sales, budget, and variance. You can even compare sales and budgets with various attributes. Extract necessary information about Products and Customers. Make the necessary dashboard with the best you can extract from the data.

Use various visualization and features and make the best dashboard. Find key metrics and factors and show the meaningful relationships between attributes. Do your own research and come up with your findings.

### Dataset:

Dataset is available in the given link. You can download it at your convenience. [Download Data](#)

## Approaches:

Python, Tableau, Power BI or you can use any tools and techniques as per your convenience. We would appreciate your valid imagination in finding solutions.

## Project Evaluation metrics:

Code: As per the requirements

- You are supposed to write code in a modular fashion
- Safe: It can be used without causing harm.
- Testable: It can be tested at the code level.
- Maintainable: It can be maintained, even as your codebase grows.
- Portable: It works the same in every environment (operating system)

## Submission requirements:

### Project work:

For : You will have to share the Tableau Public Link of your work

Tableau You have to submit your code PDF file at the final submission.

For Python:

### Detail project report:

You have to create a detailed project report and submit that document as per the given sample.
